The Arch

<https://info.rpi.edu/the-arch>

The Arch is a unique approach for student development and growth that prepares students to meet the multifaceted challenges of the 21st century. The Arch will augment academic and experiential programs, and provide an even more robust-and transformative-educational experience for undergraduate students.

Students in the Class of 2022 will be required to participate in the Arch program in summer 2020. There is an [exception process](#) for athletes, ROTC, and a few other select cases.

The Arch is a restructuring of the Rensselaer academic calendar. It creates additional opportunities for experiential learning that complement curricular and co-curricular offerings at Rensselaer.

Rising juniors will attend a full summer semester, The Arch, between their sophomore and junior years. Juniors then spend a semester away during either the fall or spring semester of their junior year, still only taking 8 semesters to graduate.

This will allow students to take advantage of the numerous experiential learning activities available off campus, including international travel, internships, co-ops, research opportunities, and engagement in community service projects.

Academic Semester Experience

YEAR	FALL	SPRING	SUMMER
Freshman	Required	Required	Optional
Sophomore	Required	Required	Required
Junior	*	*	Optional
Senior	Required	Required	Graduate

* option for an "away" semester

Biomedical Engineering

Biomedical engineering is a discipline that advances knowledge in engineering, biology and medicine, and improves human health through activities that integrate the engineering sciences with the biomedical sciences and clinical practice. In other words, biomedical engineering is a multidisciplinary field combining engineering, basic sciences and medicine.

Biomedical engineering produces a better understanding of

- How the body works.
- How the body becomes diseased.
- Ways to prevent/protect the body from disease.
- Novel mechanisms to reverse the disease process.
- Novel ways to repair diseased tissue.
- New devices to replace diseased tissue.

Biomedical Engineers develop devices and procedures that solve medical and health-related problems by combining their knowledge of biology and medicine with engineering principles and practices. Many do research, along with medical scientists, to develop and evaluate systems and products such as artificial organs, prostheses (artificial devices that replace missing body parts), instrumentation, medical information systems, and health management and care delivery systems. Biomedical engineers also may design devices used in various medical procedures, imaging systems such as magnetic resonance imaging (MRI), and devices for automating insulin injections or controlling body functions. Some specialties within biomedical engineering are biomaterials, biomechanics, medical imaging, rehabilitation engineering, and orthopedic engineering.

Biomedical Engineers are expected to have employment growth of 27% over the next decade, [much faster than the average](#) for all occupations. The aging of the population and a growing focus on health issues will drive demand for better medical devices and equipment designed by biomedical engineers. Along with the demand for more sophisticated medical equipment and procedures, an increased concern for cost-effectiveness will boost demand for biomedical engineers, particularly in pharmaceutical manufacturing and related industries.

The median salary for biomedical engineers, according to the US Department of Labor (<http://www.bls.gov/ooh/architecture-and-engineering/home.htm>), was \$86,960 as of May 2012.

					Hum., Arts or Soc. Sci. Elective ¹	4		

The minimum number of credit hours for the degree is 128

¹ Placement of humanities and social science electives can be varied with free electives. The courses counted as free electives must show a minimum of twelve (12) credit hours.

² Professional Development II will be fulfilled from a published list at the start of each semester and can be taken either semester. Professional Development III can be taken either semester of the senior year. Professional Development I is part of ENGR 2050.

³ BMED 4010 may be taken in either Spring or Summer Year 3 or Fall Year 4.

⁴ The minimum total credit hours of free electives is twelve (12), with no restrictions on the included number of 3 and 4 credit hour courses.

⁵ Capstone writing-intensive course.

⁶ ENGR 1400 may be taken as alternative to ENGR 1200. This course may be taken either semester..

Core BME Courses

Core BME Courses (and recommended semesters for taking them)

All of these courses are required for a BME degree and they need to be taken for a letter grade. No substitutions with other courses offered at Rensselaer are allowed.

BMED 2100	Biomaterials Science and Engineering	(4CR) (S2)
BMED 2300	Bioimaging and Bioinstrumentation	(4CR) (S2)
BMED 2540	Biomechanics	(4CR) (S2)
BMED 4010	BME Lab	(4CR) (S3, F4 or Summer of Arch)
BMED 4200	Modeling of Biomedical Systems	(4CR) (F3 or Summer of Arch)
BMED 4260	BME Product Devel. & Commercialization	(3CR) (F4)
BMED 4500	Advanced Systems Physiology	(4CR) (S3)
BMED 4600	BME Design	(3CR) (S4)

Concentrations Courses

Each concentration consists of three required courses which have to be taken for a letter grade.

1) Biomaterials Concentration (3 required courses):

ENGR 1600	Materials Science	(4 CR) (F, S & Summer)
ENGR 2250	Thermal and Fluids Engineering I	(4 CR) (F, S & Summer)
MTLE 2100	Structure of Engineering Materials	(4 CR) (S)

2) Biomechanics Concentration (3 required courses):

BMED 4540	Biomechanics II	(3 CR) (F)
BMED 4580/6480	Biomedical Fluid Mechanics	(3 CR) (F)
ENGR 2250	Thermal and Fluids Engineering I	(4 CR) (F, S & Summer)

3) Bioimaging/Instrumentation Concentration (3 required courses):

ECSE 2010	Electric Circuits	(4 CR) (F, S & Summer)
ECSE 2410	Signals and Systems	(3 CR) (F, S & Summer)
ENGR 2350	Embedded Control	(4 CR) (F, S & Summer)

BME Technical Electives

Two BME Technical Elective courses need to be taken. These courses need to be 3 or 4 credit hour courses and they have to be taken for a letter grade. The BME Technical Elective courses can be chosen from the attached list or they can be any formal 4000- or 6000-level BMED course, i.e., no “Studies in BME”, “Topics in BME” or research courses. It is not possible to take the same course at the 4000- and 6000-level, nor is it possible to get credit twice for a course (once as an elective and once as a concentration course). BME Technical Electives can be taken to either add depth to an existing concentration or to add breadth to the degree.

Premed BME Baccalaureate Program

First Year							
Fall Semester		Cr		Spring Semester		Cr	
BIOL-1010/15	Intro to Biology +Lab	4		BIOL-2120	Intro to Cell & Mol Biology	4	
CHEM-1100	Chemistry I	4		CHEM-1200	Chemistry II	4	
ENGR-1100	Intro to Eng Analysis	4		ENGR-1300	Engineering Processes	1	
ENGR-1200	Eng Graphics & CAD ⁴	1		MATH-1020	Calculus II	4

Fourth Year							
Fall Semester		Cr		Spring Semester		Cr	
BMED-4010	Bioeng Lab ²	4		BMED-4600	BME Design ³	3	
BMED-4260	BME Prod. Dev & Com	3		ENGR-4010	Professional Development III	1	
	Concentration II	3			BME Tech Elective I	3	
	Concentration III	3			BME Tech Elective II	3	
	Hum., Arts or Soc. Sci. Elective ⁵	4			Hum., Arts or Soc. Sci. Elective ⁵	4	
					Hum., Arts or Soc. Sci. Elective ⁵	4	

The minimum number of credit hours for the degree is 136

¹ Professional Development II will be fulfilled from a published list at the start of each semester and can be taken either semester. Professional Development III can be taken either semester of the senior year. Professional Development I is part of ENGR 2050.

² BMED 4010 may be taken in either Spring Year 3 or Fall Year 4.

³ Capstone writing-intensive course.

⁴ ENGR 1400 may be taken as alternative to ENGR 1200. This course may be taken either semester.

⁵ Two of the HASS Electives need to be either COMM, LITR, or WRIT to satisfy the English requirement that most medical schools have.

Chemical & Biological Engineering

The major educational objective in the Howard P. Isermann Department of Chemical and Biological Engineering is to prepare students to enter their engineering practice dealing with chemical as well as physical processes to meet the challenges for the future. The curriculum, which builds on chemistry, biology, mathematics, basic sciences, and engineering science, culminates in professional applications in which theory is tempered by engineering art and economic principles. Through this curriculum, graduates are prepared equally well for professional practice or for advanced study.

Opportunities for creative and satisfying practice in chemical and biological engineering can be found in conception, design, control, or management of processes involving chemical and/or biochemical transformations. These processes range from the more conventional conversion of crude oil into petrochemicals and plastics, to the development of novel processes for the production of biopharmaceuticals, to the creation of lab on chip devices using nanomaterials. The chemical conversion of resources into new, more useful forms has been the traditional concern of chemical engineers. In recent years there has developed a critical concern with the depletion of resources, leading to increased efforts to conserve, recycle, and find alternatives. Concurrently with high-technology advances in biochemical and semiconductor processing, these developments pose challenges that fall on the chemical engineering profession.

An undergraduate degree that works! Our chemical engineering graduates are well prepared for advanced graduate study and for professional practice. The companies employing Rensselaer chemical engineering graduates during the past decade are:

Amgen (biopharmaceuticals),	BioGen-IDG (biopharmaceuticals),
Centocor (biopharmaceuticals),	ExxonMobil (oil and chemicals),
General Electric (plastics),	Human Genome Sciences (biopharmaceuticals),
IBM (semiconductors),	Intel (semiconductors),
Genzyme (pharmaceuticals)	Millipore (biopharmaceuticals),
Merck (pharmaceuticals),	Procter & Gamble (consumer products)
Regeneron (pharmaceuticals)	Sanofi (pharmaceuticals)

Diverse career choices exist not only in the chemical industry, but in virtually all processing industries, including agricultural, biotechnology, biomedical, chemical, food, nuclear, semiconductor processing, and environmental operations. By emphasizing basic principles, the program prepares its graduates for positions spanning the spectrum of activities from research and development, to process and project engineering, to production, or to technical marketing. Chemical engineering also provides an excellent background for entering medical school and law school.

Electives	<i>The chemical engineering elective must be 4000-level and above chemical engineering or in an approved, advanced chemical engineering subject. The engineering elective cannot be a chemical engineering course; it must be at least 2000-level and contain 4 credits of engineering topics. This elective cannot be ENVE 2110 or ENGR 2250.</i>			Footnotes	<ol style="list-style-type: none"> 1. <i>May be replaced by ENGR 1300, although CHME 1010 is recommended.</i> 2. <i>These required courses may be taken in either order.</i> 3. <i>May be replaced with BIOL 1010, but BIOL 2120 is recommended.</i> 4. <i>Choice of STSS ### or a course from the list of approved course published each year.</i> 		

Civil Engineering

Civil engineers are involved in providing the physical infrastructure that supports civilization, including shelter, transportation, water supply and waste disposal and/or recycling. Constructed facilities, their planning, analysis, design, construction, maintenance and operation, are the forte of civil engineering. Civil engineers use computational tools, engineered and natural materials, and human creativity to design, construct, and maintain the physical infrastructure, which supports the quality of life of the Earth's population.

For the individual who has a strong interest in innovative planning, design and construction, civil engineering offers far ranging opportunities for applying knowledge and creativity in making the world a better place to live.

Students in civil engineering study the common two year core curriculum in engineering, followed by core civil engineering courses in structural engineering, geotechnical engineering, transportation engineering, and environmental engineering. These courses are supplemented by elective concentrations in any one of the sub-areas listed above.

² CIVL 1100 may be replaced with ENGR 1300.

³ CSCI 1190 may be replaced with CSCI 1100.

⁴ Allowable courses are listed under Design Elective and Technical Electives.

⁵ This course will be fulfilled from a list published at the start of each semester.

⁶ Any 4-credit course in the School of Science with a prefix of ASTR, BCBP, BIOL, CHEM, EARTH, MATH or PHYS.

⁷ Any 4-credit course in the School of Science with a prefix of ASTR, BIOL or EARTH.

128 credits minimum

CE DESIGN ELECTIVES AND CONCENTRATIONS: Students must take at least two CE design electives in one concentration.

Structural Engineering

CIVL 4070 Steel Design

CIVL 4010 Foundation Engineering

Environmental Engineering

ENVE 4200 Solid and Hazardous Waste Eng.

ENVE 4340 Physicochemical Processes in Env. Eng.

Geotechnical Engineering

Students must take: CIVL 4080 Concrete Design

And must choose a second course from the following:

Transportation Engineering

CIVL 4620 Mass Transit Systems

CIVL 4660 Traffic Engineering

CIVL 4640 Transp. System Planning

CIVL 4670 Highway Engineering

ENVE 4330 Introduction to Air Quality

ENVE 4350 Biological Processes in Env. Eng.

CIVL 4140 Geoenvironmental Eng.

CIVL 4150 Experimental Soil Mechanics

CE TECHNICAL ELECTIVES Any of the design electives listed above may be taken as a CE Technical Elective, provided the necessary pre-requisites have been met. The following other courses may also be selected.

CIVL 2040 Professional Practice

CIVL 4440 Matrix Structural Analysis

CIVL 4240 Intro. to Finite Elements

CIVL 4450 Conceptual Structural Systems

CIVL 4270 Construction Management

CIVL 4570 Analytical Methods in Civil Eng. Systems

CIVL 4280 Design for Constructability

Additional Courses: To satisfy the CE Technical Elective requirement, students may choose an additional CE Design Elective within any concentration or, with adviser approval, courses from related disciplines. These related disciplines include architecture, environmental engineering, earth and environmental sciences, mechanical engineering, chemical engineering, industrial engineering, and operations research. A representative list of such courses is as follows:

ENVE 4110 - Aqueous Geochemistry

ERTH 4710 - Groundwater Hydrology

ERTH 2120 - Structural Geology

MATH 4800 - Numerical Computing

ERTH 2330 - Earth Materials

Civil Engineering Curriculum Helpful Hints

Students who follow the Civil Engineering curriculum template will graduate with a BSCE degree in 4 years. Transfer students and those electing Co-op or Semester Abroad experiences may need to deviate from the template; however, it is often still possible to graduate in 4 years. Guidance is provided below on which deviations from the standard template are possible and which should be avoided to ensure timely completion of the BSCE degree.

- 1) ENGR 2530 (Strength of Materials) is a prerequisite for both CIVL 2630 (Intro. to Geotechnical Engineering) and CIVL 2670 (Intro. to Structural Engineering). Hence, ENGR 2530 should be taken no later than Fall/Sophomore year. If that is not possible, please consult with your academic advisor.
- 2) The four CE Intro. courses – CIVL 2030, CIVL 2630, CIVL 2670 and ENVE 2110 – are only offered in the spring semester. It is best to take these spring semester of the Sophomore year. If taking all four courses during Spring/Sophomore year is not possible, then take the Intro. courses in your specific area of interest and defer others (e.g., if you are interested in structural engineering, take CIVL 2670, and maybe CIVL 2630, during Spring/Sophomore year and defer CIVL 2030 or ENVE 2110 to Spring/Junior year).
- 3) CIVL 4920 (CE Capstone Design) is only offered in the spring semester. If you will be taking 4 ½ years to complete your degree, arrange your courses so that the Capstone pre-requisites (two design course sequence) are completed prior to Spring/Senior year.
- 4) Except for ENGR 2530 (Strength of Materials), students can take most required ENGR courses, specifically ENGR 2090, 2250, 2600, and 4760, whenever the prerequisite/corequisite is completed.
- 5) If you are planning to be away from campus for either the Co-op or Study Abroad program, the best time to participate in these programs is the fall semester of Junior year.
- 6) Maximize job opportunities in civil engineering by taking CIVL courses to satisfy the free elective course requirements.

Environmental Engineering

The Environmental Engineering program brings together dedicated people to study and work on the pressing environmental issues of our time. We prepare students for environmental careers in consulting engineering practice, private industry, national and international research laboratories, government agencies, and academia, as well as in many cross-disciplinary areas of engineering, science, and public policy. The department maintains close ties with people and organizations in all these career venues through an active research agenda and a vibrant alumni community. Student needs and career objectives are met through a well-crafted, rigorous, and interdisciplinary curriculum that stresses hands-on learning, grounding in fundamentals, and practical experience.

Our long-standing tradition of education in environmental problem solving at Rensselaer spans from the pioneering work on water analysis by William Pitt Mason in the later 1800's to the visionary environmental engineering ideas of Edward J. Kilcawley who introduced environmental engineering as an option in the mid-1940's and as a degree program in the mid-1950's. In addition to the Department of Civil and Environmental Engineering, there are faculty members at Rensselaer with teaching and research interests in environmental problem solving in the departments of Biology, Chemical Engineering, Chemistry, Earth and Environmental Sciences, and Applied Math.

1. CIVL 1200 may be replaced with ENGR 1200 or ENGR 1400.
2. Choose CHEM 1200 and either BIOL 1010 or another biology course chosen in consultation with adviser. Order does not matter.
3. CIVL 1100 may be replaced with ENGR 1300.
4. ENGR 2250 may be replaced by CHME 4010.
5. CSCI 1190 may be replaced with CSCI 1100 or CSCI 1010.
6. This course will be fulfilled from a list published at the start of the semester.
7. Multidisciplinary engineering elective: must be a 3- or 4-credit engineering course, chosen in consultation with the adviser (e.g., CIVL 2030, CIVL 2630, ENGR 1600, ENGR 2530, ENGR 4760, ISYE 4140, ISYE 4240).
8. Technical electives must be an engineering course 2000 level or above, selected in consultation with the program adviser (e.g., ENVE 4110, ENVE 4200, ENVE 4210, ENVE 4240). With adviser approval, courses from other disciplines may also be taken. These include Civil Engineering, and Chemical Engineering (for example, CHME 4030, CIVL 2630, CIVL 4150, CIVL 4570, and others).
9. Earth Science Elective: must be an Earth Science course 2000-level or above. Choose from EARTH 2140, EARTH 2160, EARTH 2330, EARTH 4070, or EARTH 4500.

EnvE Multidisciplinary Engineering Electives

Core Engineering

ENGR 1600 Materials Science
 ENGR 2530 Strength of Materials
 ENGR 4760 Engineering Economics

Transportation Engineering

CIVL 2030 Intro. to Transportation Engineering

Geotechnical Engineering

CIVL 2630 Intro. to Geotechnical Engineering

Industrial and Systems Engineering

ISYE 4140 Statistical Analysis
 ISYE 4240 Engineering Project Management

Mechanical, Aerospace and Nuclear Engineering

MANE 2710 Thermodynamics

EnvE Technical Electives

Environmental Engineering

ENVE 4110 Aqueous Geochemistry
 ENVE 4200 Solid and Hazardous Waste Eng.
 ENVE 4240 Bench Scale Design
 ENVE 4360 Geomicrobiology
 ENVE/ERTH 4560 Isotope Geochemistry
 ENVE/ERTH 4710 Groundwater Hydrology
 ENVE 496X Special Topics announced each semester

Civil Engineering

CIVL 2630 Intro. to Geotechnical Engineering
 CIVL 4140 Geoenvironmental Engineering

Chemical Engineering

CHME 4030 Chemical Process Dynamics & Control
 CHME 4400 Chromatographic Separation Processes

128 credits minimum

Environmental Engineering Curriculum Helpful Hints

Students who follow the ENVE curriculum template will graduate with a BS ENVE degree in 4 years. Transfer students and those electing Co-op or Semester Abroad experiences may need to deviate from the template; however, it is often still possible to graduate in 4 years. Guidance is provided below on which deviations from the standard template are possible and which should be avoided to ensure timely completion of the BS ENVE degree.

- 1) ENGR 2250 Thermal and Fluids Engineering I is a prerequisite for courses in the Junior year. It is also a corequisite for Intro to Environmental Engineering. Therefore, it should be taken in the fall of Sophomore year.
- 2) There are two science electives in the Environmental Engineering curriculum. Students must choose Chemistry II (CHEM 1200) and a biology course; order does not matter. Courses that fulfill the biology requirement include BIOL 1010 - Introduction to Biology and BIOL 2120 - Introduction to Cell and Molecular Biology. Neither course has a prerequisite. With permission of the instructor, [BIOL 4310 - Microbiology](#) may also be selected.
- 3) Students interested in environmental issues related to soils (landfill design, soil remediation) are encouraged to take CIVL 2630 Intro. to Geotechnical Engineering. After Fall 2018, it will only be offered in the spring semester. Note that ENGR 2530 Strength of Materials is a prerequisite for CIVL 2630; this course will fulfill the Multidisciplinary Engineering elective requirement.
- 4) ENVE 4180, Environmental Process Design, is a capstone design course offered only in the spring semester. You should arrange your courses to complete ENVE design courses prior to taking ENVE 4180. These include ENVE 4200 Solid and Hazardous Waste, ENVE 4330 Introduction to Air Quality, ENVE 4310 Applied Hydrology and Hydraulics, ENVE 4340 Physicochemical Processes, and ENVE 4350 Biological Processes.
- 5) If you are planning to be away from campus for either the Co-op or Study Abroad program, the preferred semester for ENVE students is fall semester of Junior year. CHEM 2250 Organic Chemistry I should be taken in your sophomore year or in the summer between the Sophomore and Junior year. The RPI equivalents of various courses offered by our overseas partners are listed on SIS. If you wish to take a course for which an equivalency has not been established, use the Transfer Credit form and supply the syllabus to the department on campus that teaches the Rensselaer version.
- 6) Maximize job opportunities in Environmental Engineering by filling free elective course requirements with ENVE courses or courses related to ENVE.

Electrical Engineering

Electrical Engineering is a dynamic and broad field that applies physics and mathematics to the creative design, research, development, testing and maintenance of diverse products prevalent in society today. From cell phones to smart cars, Light Emitting Diodes to autonomous robots, nano to macro, electrical engineering continues to grow as an integral part of our multidisciplinary, technological society.

Computer & Systems Engineering

Computer and Systems Engineering is a dynamic field that creatively applies computers and mathematics to the design, development, testing, and implementation of a wide range of products. From secure wireless networks to medical imaging systems, from autonomous mobile robots to face recognition security systems, from aircraft control systems to mapping the world, from distributed underwater pollution sensors to the next generation Internet, from handheld games to MP3 players, these systems are built by RPI computer engineers.

	Restricted Elective ^{1,4,5}	3			Hum., Arts or Soc. Sci. Elective	4
	Technical Elective ^{1,4,5}	3-4				

1 May be taken either term.

2 The free electives must total to at least 12 credits.

3 This course will be fulfilled from a list published at the start of each semester.

4 It is recommended that students use electives to form a concentration. See the ECSE Web page for concentration listings.

5 No more than one Independent Study course may be used to when satisfying the combined Technical and Restricted Elective requirements.

6 May be replaced with ENGR-1100 Introduction to Engineering Analysis

128 credits minimum

RESTRICTED ELECTIVE

Any 3 or 4 credit hour course with the designation ECSE-4xxx or ECSE-6xxx.

TECHNICAL ELECTIVE

Any 3- or 4-credit-hour course in engineering, mathematics, or science at the 4000 level or higher.

LAB ELECTIVES

ECSE 4090 Mechatronics
 ECSE-4130 Electric Power Eng. Lab
 ECSE-4220 VLSI Design
 ECSE-4760 Real-Time Cntrl & Comm.
 ECSE-4770 Cptr H'ware Design
 ECSE-4790 Microprocessor Systems
 ENGR-4710 Adv. Manufacturing Lab I

SCIENCE ELECTIVE

CHEM-1100 Chemistry I
 BIOL-1010/1015 Introduction to Biology/Lab
 BIOL-2120 Cell and Molecular Bio.

MATH/SCIENCE ELECTIVE

A 4-credit-hour course (or a 3-credit-hour course with a 1-credit-hour laboratory) in Science (ASTR, BIOL, CHEM, EARTH, PHYS) or Mathematics (MATH, MATP). An independent Study course cannot be used to satisfy this requirement.

CHEM-1100 Chemistry I

Industrial and Management Engineering

The most distinctive aspect of IME is the flexibility it offers. Whether it's shortening a rollercoaster waiting line, streamlining an operating room procedure, distributing products worldwide, or manufacturing superior automobiles, all these challenges share the common goal of saving money and increasing efficiencies which is a core focus of this discipline. Industrial engineering encompasses service industries as well as manufacturing, with IMEs employed in entertainment industries, shipping and logistics businesses, and health care organizations. The integration of people, materials, capital, equipment, and energy into productive systems is the IME's main concern. An IME may be involved in scheduling crews and flights at an airline, planning production at a manufacturing plant, designing automation solutions in a distribution warehouse, or building information systems to support organizational decision making.

As companies adopt management philosophies of continuous productivity and quality improvement to survive in the increasingly competitive world market, the need for IME's is growing. IME's are the only engineering professionals trained specifically to be productivity and quality improvement specialists. Many practitioners say that an IME education offers the best of both worlds: a combination of engineering and business education. This is why many industrial engineers end up being promoted into senior management positions.

IMEs make processes better through:

- More efficient and more profitable business practices
- Better customer service and product quality
- Making work safer, faster, easier, and more rewarding
- Helping companies produce more products quickly
- Making the world safer through better designed products and processes
- Reducing costs associated with new technologies

The U.S. Bureau of Labor Statistics [BLS] has described a typical IME's function as follows:

Industrial engineers determine the most effective ways for an organization to use the basic factors of production-people, machines, materials, information, and energy-to make or process a product. They are the bridge between management and operations. They are more concerned with increasing productivity through the management of people, methods of business organization, and technology than are engineers in other specialties, who generally work more with products or processes.

					Free Elective III	4	

1. ENGR 1200 and ENGR 1300 may be taken in either order. ENGR 1300 may be replaced with ISYE 1100 Introduction to Industrial and Systems Engineering. ENGR 1200 may be replaced with ENGR 1400 Engineering Communications.
2. This course is only offered in the spring semester.
3. IME majors may select any 4-credit course with the designation ASTR, BCBP, BIOL, CHEM, EARTH, MATH, or PHYS to satisfy the science elective requirement.
4. IME majors must select one of the following restricted electives to satisfy the Management Elective:

ECON 1200 Introductory Economics	MGMT 1100 Introduction to Management
MGMT 2300 Fundamentals of Accounting for Decision Making	MGMT 4510 Invention, Innovation, and Entrepreneurship
MGMT 4520 Introduction to Technological Entrepreneurship	PSYC 1200 General Psychology
5. This course can be fulfilled by taking a 2-credit or 4-credit course from a list of courses approved to satisfy the PD II requirement. This list is published each semester at the start of the preregistration period.
6. This course is only offered in the fall semester.
7. IME majors must select five courses from the following list of technical electives. A minimum of three of these courses must have an ISYE prefix. Note that not all courses are offered every year

ENGR 1600 Materials Science for Engineers	ENGR 2090 Engineering Dynamics
ENGR 2250 Thermal and Fluids Engineering I	ENGR 2300 Electronic Instrumentation
ENGR 2350 Embedded Control	ENGR 2530 Strength of Materials
ENGR 2710 General Manufacturing Processes	ENGR 4710 Manufacturing Processes & Systems Laboratory I
ENGR 4720 Manufacturing Processes & Systems Laboratory II	ISYE 4200 Design and Analysis of Work Systems
ISYE 4220 Optimization Algorithms and Applications	ISYE 4230 Quality Control
ISYE 4240 Engineering Project Management	ISYE 4250 Facilities Design & Industrial Logistics
ISYE 4260 Human Performance Modeling and Support	ISYE 4280 Decision Focused Systems Engineering
ISYE 4300 Complex Systems Models for Industrial & Systems Engineering	ISYE 4310 Ethics of Modeling for Indus. & Systems Eng
ISYE 4320 Theory of Scheduling	ISYE 4330 Design of Experiments
ISYE 4760 Mathematical Statistics	ISYE 4810 Computational Intelligence

Special undergraduate sections or regular graduate sections of 6000-level ISYE courses can also serve as technical electives except for ISYE 6600, ISYE 6610, and ISY 6620. .

Materials Science & Engineering

Materials Science and Engineering is an interdisciplinary branch of engineering that investigates the performance and properties of materials through manipulation of matter at the atomic and molecular length scales. This discipline has helped to define the technological sophistication of human history as discoveries of new materials enable new technologies that help to improve our day-to-day lives. This rich tradition of discovery continues to this day through our research in metals, semiconductors, ceramics, polymers, composites, biomaterials, materials for energy, and nanomaterials.

As a materials engineer you will help to discover and synthesize materials for applications across all industries. The materials that surround us and help us to live healthy lives, work safely, and travel are products of our ability to manipulate matter at the atomic scale.

At the core of our discipline we understand and leverage the interrelationship between material structure, processing, properties and performance. Understanding this relationship allows a materials engineer to design and synthesize new materials for new and improved applications.

RESTRICTED ELECTIVES (4 Credits Each)

ECSE 2010 - Electric Circuits	ENGR 2090 - Engineering Dynamics	ENGR 2300 - Electronic Instrumentation
ENGR 2350 - Embedded Control	ENGR 2530 - Strength of Materials	BMED 2540 - Biomechanics ⁵

MATERIALS ELECTIVES (3 Credits Each)

MTLE 4030 – Glass Science	MTLE 4050 – Introduction to Polymers	MTLE 4310 – Corrosion
MTLE 4430 – Fundamentals Alloy Systems	MTLE 4440 – Thin Films	MTLE 4460 – Materials for Energy
MTLE 4470 – Biology in Materials Science	MTLE 4520 – Materials Extreme Cond.	
MTLE 4720 – Applied Mathematical Methods in Materials	MTLE 4960 – Topics in Materials Engineering	

Note: The courses in the Materials Electives list may be substituted with any MTLE 4000- or 6000-level course. In order to take a 6000-level course, students may be required to obtain formal approval from the Office of Graduate Education, as specified in the course catalog. The free electives must total at least 12 credits.

1. This course can be taken in either semester.
2. May be replaced by ENGR 1300 or another engineering exploration course.
3. May be replaced by ENGR 1400.
4. This course will be fulfilled from a list published at the start of each semester.
5. This restricted elective option is available to dual MTLE/BMED majors only.

*Students who are officially exempt from the Arch will take these courses in the fall semester. ENGR 1300 will replace MTLE 2500. Students should speak with their advisor, as other substitutions may be needed.

Note this checklist is to be used as a guide to developing the registration plan for Materials Science & Engineering students. It is not a replacement for the Rensselaer Course Catalog.

Aeronautical/Aerospace Engineering

Today's aeronautical engineers not only develop airplanes and rockets, they design high-speed trains and submarines, hydrofoils and wind turbines. Rensselaer graduates have helped to develop the engines that propel jumbo jets, the lunar lander for the Apollo spacecraft, and the Rover for the Mars Exploration Mission.

At Rensselaer, you will begin with core engineering, basic science, computing, and the fundamentals of flight. These will prepare you for further studies of fixed-wing and rotary-wing aircraft, lightweight structures, propulsion, and space vehicle design. Our programs place emphasis on research, design, development, and operation of flight vehicles for aeronautical and space applications. In their senior year, undergraduates may focus on fixed-wing aircraft, rotary-wing aircraft, or spacecraft design, though none of these choices precludes employment or graduate work in any other focus area. Our graduates choose careers in industry or government laboratories, doing research in anything from high-speed aerodynamics or high-temperature strength of jet engine blades, to the sale of aircraft and aircraft components. (And head coach of an NFL football team.)

Mechanical Engineering

Mechanical engineers design, develop, manufacture, sell, and maintain machinery. Air conditioning and heating systems, automobiles, jets, power plants, spacecraft, and oil drilling equipment all bear the imprint of the mechanical engineer.

As an undergraduate, you'll follow the core engineering curriculum in your first two years, gaining a solid grounding in mathematics, physics, and chemistry, as well as taking introductory courses in computing and mechanical engineering. You can then opt for technical electives in aeronautics, applied mechanics/mechanics of materials, control systems, energy systems, manufacturing and design, or space technology. Many mechanical engineering graduates assume positions of management, while others prefer a career along technical lines

Nuclear Engineering

Nuclear engineering focuses on methods, devices, and systems to get benefits from the peaceful use of nuclear energy and radiation. At Rensselaer, you'll begin with fundamentals in chemistry, physics, and mathematics, core engineering, computing, and Nuclear Phenomena for Engineering Applications. These will prepare you for further studies in nuclear energy production, energy systems, health physics, and radiation technology.

Areas of research pursued at Rensselaer include reactor engineering, thermal-hydraulics, health and medical physics, dosimetry, radiation transport, neutron scattering, and x-ray production. Careers in nuclear engineering include electricity production, food safety, medical diagnostics and treatment, space and underwater propulsion applications, and non-destructive testing for industry.

A note about the MANE Office of Undergraduate Student Services:

Located in JEC 2012 you will find the MANE Office of Undergraduate Student Services. This office was established by the MANE department to assist undergraduates as they navigate through their four years at Rensselaer. Here you will find all necessary Registrar's Office forms and advice to help you complete them; assistance with Registration issues; help with curriculum and course selection; and even some candy to help you through your day.

MANE-2710	Thermodynamics ¹	3	MANE-2720	Fluid Mechanics	3
MATH-2400	Introduction to Differential Equations ¹	4	MATH-2010	Multivariable Calculus and Matrix Algebra	4
	SoE Engineering Design Elective ^{1,5,6}	4		Hum., Arts or Soc. Sci. Elective ³	4
THIRD YEAR ⁹					
	ARCH (16 credits)	Credits		FALL OR SPRING (16 credits) ⁹	Credits
ENGR-2090	Engineering Dynamics ⁴	4	MANE-4500	Modeling & Control of Dynamic Systems ⁶	3
MANE-4060	Aerospace Structures and Materials	4	MANE-4900	Aeroelasticity and Structural Vibration	3
MANE-4070	Aerodynamics I	4	MANE-4910	Fluid Dynamics Laboratory ⁸	2
	Hum., Arts or Soc. Sci. Elective ³	4	MANE-4920	Aerospace Structures and Controls Lab ⁸	2
			STSS-4###	Professional Development II ^{1,6,7}	2
				Free Elective I ^{6,9}	4
FOURTH YEAR					
	FALL (16 credits)	Credits		SPRING (15 credits)	Credits
MANE-4080	Propulsion Systems	3	ENGR-4010	Professional Development III ¹	1
MANE-4510	Control Systems Laboratory ^{1,8}	2	MANE-4###	Capstone Design Elective ^{9,12}	3
MANE-4###	Computation Intensive Elective ^{1,10}	3	MANE-4###	Aerospace Technical Elective ^{1,13}	3
MANE-4###	Flight Mechanics Elective ^{9,11}	4		Free Elective III ¹	4
	Free Elective II ¹	4		Hum., Arts or Soc. Sci. Elective ³	4

¹ These required courses may be taken in any order in the academic year shown (or in a previous year) given the pre-requisites are met.

² Choice of ENGR-1200 Engineering Graphics & CAD, ENGR-1400 Engineering Communication, or CIVL-1200 Engineering Graphics for Civil Engineers; EG&CAD is preferred for Aerospace Engineers.

³ The five HASS Electives may be taken in any semester; it is recommended to schedule one in each of the first two semesters and at least one in the Arch summer term.

⁴ Any 1 credit engineering exploration elective (e.g., "Introduction to [major]") may be substituted.

⁵ Choice of ENGR-2050 Introduction to Engineering Design or MANE-2220 Inventor's Studio ¹; both have Professional Development I embedded in them.

⁶ These courses may be taken in the Arch Summer semester (if the summer schedule permits).

⁷ For a list of courses that satisfy the PD II requirement refer to the link "Courses which satisfy PD II requirement" on the SIS home page.

⁸ These three laboratory courses may be taken any semester in the junior or senior year, provided all prerequisites have been completed.

⁹ Aeronautical Engineering students should start planning for their Flight Mechanics/Capstone track prior to the Arch summer. Those on the Space Flight track must take MANE-4100 Spaceflight Mechanics during spring semester of third year (in place of the free elective) to assure timely graduation.

¹⁰ Choice of MANE-4140 Intro to Computational Fluid Dynamics, MANE-4240 Intro to Finite Elements, or MANE-4280 Design Optimization.

¹¹ Choice of MANE-4090 Flight Mechanics, MANE-4200 Rotorcraft Performance, Stability, and Control, or MANE-4100 Spaceflight Mechanics (as noted, the latter must be taken in spring semester of third year to assure timely graduation).

¹² Choice of MANE-4230 Air Vehicle Design, MANE-4850 Space Vehicle Design, or MANE-4860 Introduction to Helicopter Design (students on the Space Flight track take MANE-4850 in fall of fourth year).

¹³ Aerospace Technical Elective: The Aerospace Technical Elective is a MANE-4000-level or higher course or research related to Aerospace Engineering that is taken for 3 credits or more. Aerospace Technical Electives may not be taken on a Pass/No Credit basis.

¹ These required courses may be taken in any order in the academic year shown (or in a previous year) given the pre-requisites are met.

² Choice of ENGR-1200 Engineering Graphics & CAD, ENGR-1400 Engineering Communication, or CIVL-1200 Engineering Graphics for Civil Engineers; EG&CAD is preferred for Mechanical Engineers.

³ The five HASS Electives may be taken in any semester; it is recommended to schedule one in each of the first two semesters and one in the Summer Arch.

⁴ For a list of courses that satisfy the PD II requirement refer to the link "Courses which satisfy PD II requirement" on the SIS home page. It must be completed before the capstone design course.

⁵ Choose from ENGR-2050 Introduction to Engineering Design and MANE-2220 Inventor's Studio I; both have Professional Development I embedded in them.

⁶ These courses may be taken in the Arch Summer semester (if the summer schedule permits).

⁷ These laboratory courses may be taken any semester in the junior or senior year, provided all prerequisites have been completed.

⁸ Mechanical Engineering students may alternatively take MANE-4220 Inventor's Studio II, MANE-4230 Air Vehicle Design, MANE-4850 Space Vehicle Design, or MANE-4860 Helicopter Design as alternative capstone design experiences, provided all prerequisites have been completed.

⁹ Computation and Technical Electives The Computation Elective must be chosen from the following list of courses: MANE-4240 Introduction to Finite Elements, MANE-4963 Introduction to Computational Fluid Dynamics, MANE-4280 Design Optimization, or MTLE-4500 Computational Methods for Materials Design. The first Technical Elective must be taken from any upper-level (4000 or above) MANE course. The second Technical Elective may be selected from any upper-level (4000 or above) course in the School of Engineering or the School of Science. An independent study course, such as a design project or an undergraduate research project in the School of Engineering or the School of Science may also be used to satisfy this requirement. Computational and Technical Electives may not be taken on a Pass/No Credit basis.

Nuclear Engineering

Minimum credit hour requirements for the Bachelor's Degree in Nuclear Engineering: 130

	Hum., Arts or Soc. Sci. Elective ³	4		Free Elective III ¹	4

1. These required courses may be taken in any order in the academic year shown (or in a previous year) given the pre-requisites are met.
2. Choice of ENGR-1200 Engineering Graphics & CAD, ENGR-1400 Engineering Communication, or CIVL-1200 Engineering Graphics for Civil Engineers.
3. The five HASS Electives may be taken in any semester; it is recommended to schedule one in each of the first two semesters and one in the Arch Summer
4. Any 1 credit engineering exploration elective (e.g., "Introduction to [major]" or ENGR-1300 Engineering Processes) may be substituted.
5. These courses may be taken in the Arch Summer semester (if the summer schedule permits).
6. For a list of courses that satisfy the PD II requirement refer to the link "Courses which satisfy PD II requirement" on the SIS home page.
7. Choose from MANE-4460 Engineering Materials for Nuclear Applications or ENGR-1600 Materials Science.
8. Choose from MANE-2220 Inventor's Studio I or ENGR-2050 Introduction to Engineering Design; both have Professional Development I embedded in them.
9. Students restricted from Arch (e.g., ROTC, certain athletes) will delay PD III until senior year, after the Professional Development I content in the Engineering Design Elective.
10. Choose from MANE-4440 Critical Reactor Lab or MANE-4960 LINAC Lab.
11. NE Technical Electives are MANE 4000-level or higher courses related to Nuclear Engineering that are taken for 3 credits or more. The NE Technical Electives allow you to focus on your technical interest or area of specialization within the Nuclear Engineering field. If you have questions regarding whether a specific course satisfies your NE Technical Elective requirements, please consult with your academic advisor. An independent study course, such as a design project or an undergraduate research project with a Nuclear Engineering instructor, may be used to satisfy one of the NE Technical Electives. NE Technical Electives may not be taken on a Pass/No Credit basis.

Foundational Mathematics, Science, and Core Engineering Courses

All engineering majors require math and science courses and in some cases those courses act as pre-requisites for other courses within the major. Those courses vary from one major to the next with the exceptions of Calculus I and II, Introduction to Differential Equations, and Physics I and II which all majors require. All Engineering majors require Introduction to Engineering Analysis.

Below is a breakdown (by major) of the required math, science, and core engineering courses.

Credits	Dept	#	Name	CEE				ECSE			MANE				
				BME	CivE	EnvE	ChBE	EE	CSE	IME	Aero	Mech	Nucl	MatE	
4	BIOL	1010	Introduction to Biology			O ₁	✓	O ₂	O ₂

			Math and Science Elective		4 (1)					4 (1)		3-4 (2)			4 (1)

Legend

✓ - named required course for major
 ✓_a - Chem I is with Advanced Lab
 ✓* - ENGR-1200 Engineering Graphics & CAD is preferred

O_j : (j=1, 7) optional/elective course(s) with rules specific to indicated program. Please see specific rule defined below for details.

O₁ : BIOL 1010 or other Biology course chose is consultation with advisor is required.

O₂ : BIOL 1010, BIOL 2120 or CHME 1100 may be used to satisfy the ELEC and CSYS majors as their "Science Elective"

O₃ : IME students must take either CSCI 1010 or CSCI 1100 to satisfy their computer science elective

O₄ : CSCI 1190 may be replaced with CSCI 1100

O₅ : CIVL 1200 is preferred, but ENGR 1200 and ENGR 1400 will satisfy this requirement

O₆ : ENGR 1300 may be replaced with 1-credit Introduction to engineering discipline course (e.g. CIVL 1100, CHME 1010, ISYE 1100, MTLE 1200)

O₇ : Multidisciplinary technical elective

(#) - credits (level) of ASTR, BCBP, BIOL, CHEM, EARTH, MATH or PHYS

HASS and PD II – Policies for Engineering Students

Engineering students at Rensselaer are required to successfully complete

- 20 credits of HASS (Humanities, Arts, and Social Sciences)
- 2 credits of PD II (Professional Development II)

as well as

- 1 credit of PD I (typically as part of ENGR-2050 Introduction to Engineering Design, or alternatively as ENGR-1010 Professional Development I if ENGR-2050 transferred in as less than a 4 credit course)
- 1 credit of ENGR-4010 PD III

for a total of 24 credits to fulfill the HASS Core requirement.

Engineering Students shall distribute the 20 credits of HASS as follows.

- A minimum of 8 credits of Humanities/Arts (see table below)
- A minimum of 8 credits of Social Science (see table below)
- At least 4 credits must be 4000+ level
- No more than 3 courses at the 1000 level (but note depth sequence and CI restriction below)
- No more than 4 credits can come from 1 credit courses (e.g. music ensemble)
- No more than 2 courses (8 credits total) can be from transfer courses (including AP/IB and study abroad classes)
- No more than 8 credits can be from Pass/No credit courses (note depth sequence and CI restriction below)

Humanities:	Social Science:
ARTS (Arts, Music)	COGS (Cognitive Science)
COMM (Communication & Media)	ECON (Economics)
LANG (Language)	PSYC (Psychology)
LITR (Literature)	STSS (Anthropology)
PHIL (Philosophy)	STSS (Sociology)
STSH (History)	STSS (Science & Technology)
STSH (Science & Technology)	
WRIT (Writing)	
IHASS (Interdisciplinary HASS)	IHASS (Interdisciplinary HASS)

A depth sequence of two courses, each of ≥ 4 credits, from the same area code (ARTS, COGS, etc., but not including IHSS) where a minimum of one course (≥ 4 credits) is at an advanced level (2000+), and no courses are taken on a Pass/No Credit basis. STSS and STSH count as the same area code.

In addition, students are required to take at least one HASS course that is “CI” (Communications Intensive – a list of these courses is available from a link on the SIS home page, and here: [http://srfs.rpi.edu/update.do?artcenterkey=208&setappvar=page\(1\)](http://srfs.rpi.edu/update.do?artcenterkey=208&setappvar=page(1))). This course may not be taken on a Pass/No Credit basis. This CI course is not required to be part of the 24 credits of HASS Core; that is, it may instead be an HASS CI course taken as a free elective

Enrolled Rensselaer students wishing to take an HASS course for credit at another accredited institution must obtain prior approval for the course from the HASS Manager of Student Services. Applicants must furnish a syllabus (preferred) or the catalog description of the proposed course and a completed copy of Rensselaer’s Transfer Credit Approval form to the HASS Manager of Student Services to apply for approval.

Cross-listed STSS/STSH courses can be switched (between H and SS) after the course is taken by making a request to the Assistant Registrar.

Through careful planning and course selection, students may fulfill more than one requirement with a single course. For example, a 4000 level CI course can cover both the CI requirement and the 4000 level requirement. Another example is a 4000 level course that can satisfy the depth requirement as long as it shares the same prefix as another course at a lower level. If that course is communications intensive it can also be used to satisfy the CI requirement, thus fulfilling three requirements with a single course. However, even though a single course may be used to fulfill more than one requirement, Engineering students **MUST STILL** have 20 credits of HASS overall.

The 2-credits of PD II shall be satisfied as follows:

STSS -496# (number to be assigned each semester) course specifically titled PD2 Tech Issues and Solutions, will satisfy the PD II requirement.

A 4-credit PD II alternate course at any level (2000-4000) can be substituted for the 2-credit course. A list of these PD II alternate courses is available from a link on the SIS home page, and here: <http://registrar.rpi.edu/update.do?artcenterkey=325>.

A course used to satisfy the PD II requirement may **not** be taken on a Pass/No Credit basis.

In general, the PD II alternate course will be split as follows:

- two credits allocated to satisfy PD II
- the remaining credits allocated to free elective (or “Not Applied” to the degree if free elective credits have been completed)

With restrictions, the credits of a PD II alternate that are not allocated to PD II may be used to fulfill the 20-credits of HASS. These credits:

- **cannot** count toward the 4000 requirement,
- **cannot** count toward the depth requirement,

However,

- they can count toward the overall 20 credits of HASS,
- they can count toward the H and SS 8-credit minimums,
- they can count toward the HASS “CI” requirement.

If a student transfers in a course that is in name and course number equivalent to a PD II alternate it counts as that named HASS course, but it does **not** transfer in its status as a PD II alternate. The student would still be responsible for taking PD II or a PD II alternate at Rensselaer.

In the rare case that a student transfers in a course with Professional Development II content nearly identical to that of STSS -496# (number to be assigned each semester) course specifically titled PD2 Tech Issues and Solutions, they may furnish a syllabus of the transfer course and a completed copy of Rensselaer’s Transfer Credit Approval form to the Associate Dean of Engineering to apply for approval. Note that some courses in the Study Abroad program automatically satisfy the PD II requirement, as indicated in the transfer equivalency guide.

The School of Humanities, Arts, and Social Sciences (HASS) Associate Dean of Academic Affairs is:

Mike Kalsher (kalshm@rpi.edu, Sage 4302)

The Assistant Registrar is: **Kim Herkert** (herkek@rpi.edu, Academy Hall 2713)

The Associate Dean of Engineering is: **Kurt Anderson** (anderk5@rpi.edu, JEC 3018)

Need an Extra Credit?

Q: What if I'm short 1-2 credits in H&SS?

A: Use a 4-credit PD II alternate, with 2 credits to PD II, 1-2 credits to H&SS as needed, and any remaining credits to free elective (or "Not Applied" if you have filled all of your free elective credits)

Q: What if I'm short 1-2 credits in Free Electives?

A: Use a 4-credit PD II alternate, with 2 credits to PD II and 2 credits to free elective

Q: Am I really free to choose my free electives?

A: There are some nominal restrictions for "free" electives. To count as a free elective, one credit classes must be either

– from the School of Engineering, or

– graded classes (though you can take these on a Pass/No Credit basis),

and

– ROTC courses (USAF, USAR, USNA) must not total more than six credits

One credit classes that are graded Satisfactory / Unsatisfactory (S/U) that are not in the School of Engineering may **not** be used as free electives. For example, PHYS-1010 A Passion for Physics is a 1-credit S/U course that will not count as a free elective.

Options for 1 credit free electives

- independent study (1 credit \approx 3 hours/week \Rightarrow \sim 45 hours of work)
- undergraduate research project (when taken for credit)
- School of Engineering courses, such as
 - CHME-1010 Introduction to Chemical Engineering
 - CIVL-1100 Introduction to Civil and Environmental Engineering
 - CIVL-1200 Engineering Graphics for Civil Engineers
 - ENGR-1300 Engineering Processes (if not required for your major)
 - ENGR-1700 Intro to Better World Engineering
 - ISYE-1100 Introduction to Industrial and Systems Engineering
 - MANE-1100 Introduction to Nuclear Engineering
 - MANE-1090 Introduction to Mechanics Hardware and Software
 - MTLE-1200 Introduction to Materials Engineering
- School of Science courses
 - ISCI-4510 Origins of Life Seminar (requires Junior standing or higher)
- HASS courses
 - ARTS-2300 Rensselaer Orchestra
 - ARTS-2310 Rensselaer Concert Choir
 - ARTS-2360 Roots of Africa Music Ensemble
- ROTC courses (USAF, USAR, USNA, up to six credits maximum)
- most one-credit topics courses (see <http://srfs.rpi.edu/update.do?artcenterkey=305>)

Checklist for HASS Core Requirements		
	Yes	No
Distribution Requirement		
<p>Have you completed the Humanities distribution requirement? (Minimum of 8 credits in courses with a Humanities and/or IHSS departmental prefix) NOTE: PD2 or alternative PD2 cannot be used</p>		
<p>Have you completed the Social Sciences distribution requirement? (Minimum of 8 credits in courses with a Social Science and/or IHSS departmental prefix) NOTE: PD2 or alternative PD2 cannot be used</p>		
Depth Requirement		
<p>Have you completed two 4-credit HASS courses with the same departmental prefix, one of which is above the 1000 level? Example COMM 1510 and COMM 2210 NOTE: Pass/No credit is not allowed Can be two courses at the 2000 level.</p>		
Communication Intensive (CI) Requirement		
<p>Have you completed at least one HASS course designated as CI? Courses designated as CI are listed online at https://sis/rpi.edu NOTE: Transfer credit and Pass/No Credit are not typically allowed.</p>		
4000 Level Requirement		
<p>Have you completed at least one 4 credit HASS course at the 4000 level?</p>		
Restrictions: Are you meeting....		
<p>A maximum of three 1000 level courses may be applied to the HASS Core</p>		
<p>A maximum of eight transfer/AP/IB credits may be counted towards the HASS core</p>		
<p>A maximum of two courses may be taken Pass/No Credit</p>		
<p>Have you completed a total of 24 credits of HASS courses? NOTE: Engineering is 22 and Architecture is 20</p>		
If you have answered all of the questions with “Yes”, then you have met the HASS Core Requirements		

Responsibilities

“We are at the very beginning of time for the human race. It is not unreasonable that we grapple with problems. But there are tens of thousands of years in the future. Our responsibility is to do what we can, learn what we can, improve the solutions, and pass them on.” **Richard Feynman (1918 - 1988)**

Student's responsibilities

- To know their advisor's office hours and advising schedule.
- To make an appointment and prepare for registration advising by reviewing the Catalog, Class-Hour Schedule, and Degree Works worksheet.
- To formulate questions regarding curriculum, course selections, career options, etc.
- To be aware of their academic and personal needs and to seek assistance when needed.
- To understand that the role of their advisor is to advise them, not to make decisions for them. Each student needs to realize that it's his or her education at stake, and that, with advisement, *they* are ultimately responsible for making any final decisions.

Advisor

- To be accessible to students throughout the year at posted office hours. If an advisor will be away from campus for an extended period of time, he or she should post the names and office locations of alternate advisors outside their offices, so that students will have other advising resources.
- To set aside designated times for registration advising and individual discussions.
- To be knowledgeable about current curriculum requirements, academic policies and procedures, referrals and resources on campus, and career opportunities in the major field.
- To guide students through academic programs that will complement their personal, educational, and professional interests.

The HUB

<http://eng.rpi.edu/students/hub>

The School of Engineering Advising Hub is the primary source of academic advising for all engineering students during their first three semesters at RPI. Beginning with the fourth semester students will be assigned a faculty advisor within their major. The Hub is located in the Ansell lounge on the third floor of the Jonsson Engineering Center (JEC) and is staffed by experienced advisors who will offer academic assistance for all engineering majors. Hub advisors assist students in establishing a foundation for academic success through student responsibility and planning. The Hub is a resource for all advising purposes including:

- Semester course planning
- Clear Student Advising Meeting (SAM) holds
- Major/minor declaration or changes
- Form approvals
- Registrar Protocol
- Arch planning
- HASS and other course requirements

The Advising Hub will offer academic support to students through the end of the fall semester of their sophomore year. At that time, students will transition to a faculty advisor specific to the student's major. The faculty advisor will then contribute to the student's academic success by offering valuable perspective on internships, research and job prospects in addition to graduation requirements.

The Advising Hub hours are Monday, Tuesday, Thursday, and Friday 9am-4pm, by appointment.

Walk-in Wednesdays offer 20 minute meetings with no appointment necessary.

Bachelor's Degree

The bachelor's degree is awarded to students who have pursued successfully, as evaluated by the faculty, a plan of study that encompasses several disciplines. Each plan of study has at least two objectives: first, to reach a pre-professional standing or fundamental mastery in a selected discipline; second, to develop some grounding in knowledge found in liberally educated persons, an appreciation of technology and science, and an openness to ongoing learning.

General requirements:

- The number of courses and credit hours is prescribed by each curriculum. Minimum requirements are **128 credits for engineering**.
- The minimum grade point average (GPA) is **2.0**.
- To receive a baccalaureate degree, a student must have been admitted to the curriculum corresponding to the degree, must have satisfied the curriculum requirements, and must be enrolled in that curriculum at the time the degree is granted.
- The course content in physical, life, and engineering sciences must total a minimum of **24 credit hours**. For information on additional requirements, see the School of Science section of the course catalog.
- The course content in humanities and social sciences must total a minimum of **24 credit hours**, including at least **eight credit hours** in the humanities and **eight credit hours** in the social sciences. For information on additional requirements, see the School of Humanities, Arts, and Social Sciences section of the course catalog.
- Every student is required to take at least **two** communication-intensive courses. At least one of these must be in the students' major and at least one of the courses must be taught in the School of Humanities, Arts, and Social Sciences. Courses used to fill the communication-intensive requirement may not be taken as Pass/No Credit.
- The minimum course concentration in the area of the selected discipline is prescribed by each curriculum but **cannot be less than 30 credit hours**.
- At least **24 credit hours are to be elective**, of which no less than **12 credit hours** are unrestricted electives.
- The student must be registered full-time for a minimum of four semesters. Two semesters of part-time study at Rensselaer will be considered equivalent to one semester of full-time study. In addition, the student must complete a minimum of **64 credit hours** at Rensselaer, all of which will be applied to the baccalaureate degree. If a transfer student elects to study abroad or enroll in the co-op program, no more than 12 such credits may apply to the 64 needed for the bachelor's degree. The student's Plan of Study at Rensselaer must include at least **16 credits** of courses above the 1000 level in the major field, or in an approved concentration.

Academic Information and Regulations

The Institute requires a degree candidate to earn the last 30 credits in courses completed on this campus or through a program formally recognized by the Institute. Transfer courses are limited to two courses or eight credits counting toward the student's last 30 credits and require approval of the director of the Advising and Learning Assistance Center.

Baccalaureate candidates must have passed all of the prescribed academic work and have satisfied the fee requirements. Candidates must also be in good academic and disciplinary standing. Undergraduate students on probation at the time of completion of course work may be required to meet certain stipulations for removal from probation. However, such requirements may be waived for those students whose cumulative GPAs satisfy the baccalaureate degree requirements. In general, a term's work with grades of not less than C will be required in programs arranged by the Committee on Academic Standing. The director of the Advising and Learning Assistance Center will state requirements to the students in writing.

Degree candidates must be registered during the semester in which they intend to graduate and must file a degree application with the registrar by the dates specified in the academic calendar. Students who previously applied for graduation but did not complete all their requirements on time must submit a new application specifying the new date of graduation.

Double Degrees

A student may become a candidate for a second baccalaureate degree when he or she has completed: (1) the equivalent of at least two terms (30 credit hours) of additional work beyond the requirements of a single degree, and (2) the courses in the department in which the student is registered and such other courses as are required for the second degree. From the School of Engineering's perspective, students considering a Double Degree may want to instead consider a Co-terminal where they obtain a BS in one major and an MS in the same major or another discipline. The ability to obtain a graduate level degree by taking 30 credits beyond the Bachelor's degree should be seriously considered rather than taking 30 additional credits and still ending up with a Bachelor's degree.

Dual Majors

Undergraduate students who fulfill all the degree requirements for two curricula and who have met the conditions below will have completed a dual major. They will receive one diploma noting both majors.

(1) The student must designate a first-named and second-named major in writing at least one semester prior to graduation, and have the appropriate department(s) approve this designation prior to filing the dual major form with the registrar.

(2) Each student will be assigned an adviser in each department who will monitor progress towards degrees in that department.

(3) The degree clearance officer in the department will certify that the student has met the degree requirements in that department.

(4) The 24-credit-hour mathematics/science requirement and the 24-credit-hour humanities and social sciences requirement will satisfy the Institute requirements for both majors.

(5) Some departments such as BMED and CHEG strongly discourage dual majors due to scheduling issues preventing students from graduating in eight semesters.

Minors

Within the distributional requirements described, the student may elect any courses that meet his or her personal or professional needs. Courses can be chosen to form a minor—that is, a set of courses coherent based on subject, methodology, or other factors. Many departments offer one or more such minors; several of the minors are interdisciplinary. A student wishing to complete a minor should consult with the adviser for that minor before completing the second course in it (departmental secretaries have this information). Minors vary in their requirements from 15 to 21 credit hours.

Courses for the minor may not be taken on a Pass/No Credit basis. No course which is required for a major can be used for a minor requirement. No course which is required for one minor can be used for another minor requirement.

Pass/No Credit

The purpose of the Pass/No Credit option is to allow you to take courses outside of your normal curriculum or minor program which you might otherwise not consider taking because of grade considerations. Please note that the Pass/No Credit option is not available to graduate students or nonmatriculated students.

Submission procedures and deadlines

If you wish to take a course with the Pass/No Credit designation, you must file an approved Pass/No Credit Form, with the Registrar's before deadline date specified in the academic calendar. Similarly, if you have elected to take a course on this basis, you must choose to drop the Pass/No Credit designation by filing a Remove Pass/No Credit Designation Form by the same deadline. Please refer to Rensselaer's academic calendar for specific dates by which you must add or remove Pass/No Credit designations.

Undergraduate students may elect to take courses on a Pass or No Credit basis, for which the grade is either "P" (Pass) or "NC" (Fail). In general:

- You may take no more than 12 credit hours of courses designated as Pass/No Credit courses, and no more than six credits of these may be Humanities and Social Sciences courses used to satisfy the requirements of the undergraduate courses in these fields. You cannot use a pass/no credit course in the HASS depth requirement.
- You may not use the Pass/No Credit designation for any courses, which you have previously failed, or for any courses which are specifically required by name or which are required to be chosen from a list of named courses in your curriculum or minor.
- You may not take any courses at the 6000 level on a Pass/No Credit basis.
- Communication Intensive courses cannot be taken as Pass/No Credit. (Effective for students who enter Fall 2010 or later)

Registration

When: Registration for the Spring semester generally occurs in early November. Registration for the Fall semester occurs the preceding Spring, usually in early April. Exact dates are included in the [Academic Calendar](#).

How: Use the [Student Information System \(SIS\)](#) to register for your courses.

Where: There are no assigned rooms for registration. You can register for your classes using any computer with Internet access.

Time tickets

As a student here at Rensselaer, you are issued a "time ticket," which assigns you a specific window of time during which you may register for the next semester. Your time ticket will be sent to your RPI email address, 2 - 3 weeks before registration. Your registration time is assigned based on the number of credit hours you have earned as a student. Please note that classes which are still in progress or courses which have been graded as "incomplete" do not count towards earned credits, nor do transferred courses and Advanced Placement (AP) credit. The table to the right shows the range of earned credit hours associated with each class.

School of Engineering

Freshman	0 - 30
Sophomore	31 - 60
Junior	61 - 95
Senior	96 - 128

You should receive your time ticket via e-mail approximately four weeks prior to the scheduled registration period. In addition to making the registration assignment, this e-mail message notifies you of any existing holds which may prevent you from registering if you do not resolve them.

Degree Works

Your Degree Works worksheet is a planning and advising tool -- available only to undergraduate students -- that allows you to track the progress you're making toward your Bachelor's Degree. You can access Degree Works via the main menu of the Student Information System (SIS).

FAQs for registration

What do I do if a class I want to register for is full?

core/required course every effort will be made to accommodate the request. If this is an elective course you may be asked to take it in a subsequent semester. Note that for Core Engineering courses (ENGR prefix) there will be an electronic waitlist available at the time of registration which is capped at ten students per section.

How do I add/drop a course?

You may use the [Student Information System \(SIS\)](#) to add or drop courses. Generally speaking, from the beginning of the semester, you will have **two weeks to add** courses and **eight weeks to drop** them. Please refer to the Academic Calendar for specific add and drop deadline dates.

If you wish to petition to add or drop classes after the published deadline, you may do so using a [Late Add/Drop Form](#). Please note that after the instructor's signature (if required), the form must also be approved by the Advising and Learning Assistance Center.

Undergraduate Research Program (URP)

Rensselaer's Undergraduate Research Program (URP) provides real-world, hands-on research experience for students like you. Through this unique program, you have the opportunity to work directly with a faculty member on a bonafide research project.

The program offers many advantages and the opportunity to:

- work on a project whose impact could be worldwide and can lead to patents and/or grants
- interact with some of the most informed and learned professors in the world
- apply knowledge gained in the classroom to actual problems and research situations
- network with faculty beyond the classroom, opening the door to other opportunities
- gain critical leadership, team-building and critical thinking skills
- establish industry connections that could lead to a co-op or future employment
- distinguish yourself from your peers
- publish as an undergraduate
- receive course credit in a more dynamic way or supplement your income

<http://info.rpi.edu/undergraduate-research>

URP application: <http://info.rpi.edu/undergraduate-research/undergraduate-research-program-academic-year/#Apply>

Rensselaer has a very strong Undergraduate Research Program. This is a program that allows students to work in a professor's laboratory for credit, cash, or experience. On average, we have 30% of the class taking advantage of these opportunities during their Rensselaer career.

Some examples of projects students have been involved in include:

- Study of Spinal Sclerosis
- Mechanical Loading of the Lumbar Spine
- Schwann Cell Migration
- Cell Based Cancer Research
- Soft Tissue Engineering
- Vascular Regulation

The program offers many advantages and the opportunity to:

- work on a project whose impact could be worldwide and can lead to patents and/or grants
- apply knowledge gained in the classroom to actual problems and research situations
- network with faculty beyond the classroom, opening the door to other opportunities
- gain critical leadership, team-building and critical thinking skills
- publish as an undergraduate
- receive course credit in a more dynamic way or supplement your income

How to find a project

Most URP projects are found through direct contact with the faculty member supervising the research. Most undergraduates find projects from faculty members from whom they have taken classes. A good place to start your search is to determine a faculty member with whom you may want to work on a project. Check their website to investigate their field of research. If it sounds interesting, approach them about a possible URP project

What if I have my own idea for a project?

You may work with a faculty member on an existing research project or on a project based on your own ideas. If you want to pursue your own project, find a faculty advisor who may be interested in your topic since you will be required to have a project advisor.

For credit or funding?

You can earn from one to four credit hours per semester for your participation in the URP. The number of credit hours you earn is negotiable between you and your faculty sponsor. If you choose this option you and your sponsor need to:

- Determine how many credit hours you will earn
- Decide exactly what is expected of you, such as your time commitment, the type of work to be submitted, etc.
- Agree on how your grade will be determined
- In the past, students who have participated in the URP for pay have earned up to \$3,000 per semester. The majority of participants earn \$400 per semester.

URP funding comes from two sources:

- Your sponsoring faculty member or department
- The Office of Undergraduate Education

The faculty sponsor or department is responsible for the financial support of your research. In addition, the Office of Undergraduate Education pays URP participants a maximum of \$400 per semester in the form of matching funds.

Most projects expect eight to twelve hours of work per week.

The URP application should be submitted to the Department Coordinator, who:

- Checks the URP Application for completeness
- Fills out your payroll paperwork
- Forwards your application and payroll paperwork to the Office of Undergraduate Education for approval
- Will set up a schedule for reporting your hours. You must submit your hours to the Department Coordinator within the same payroll period that you worked. Please keep in mind that if you work and submit hours that exceed your funding allotment, you will not be paid for those hours. Pay checks are issued every other Friday

Where can I find information on jobs for engineering majors?

The US Department of Labor (http://www.bls.gov/oes/current/oes_nat.htm#17-0000) provides information on the various fields of engineering and statistics concerning salary and job outlooks.

By when does a student need to choose the major?

Students have two semesters in which to declare a major and still be able to graduate in four years.

How do I change my major?

It is important to meet not just with your current advisor but also with the advisor in your prospective department. He or she will help you determine what requirements you will need to meet and whether they involve additional courses or credit hours. The Undergraduate [Change of Major/Change of Status](#) form must be completed and signed by the Associate Dean in JEC 3018.

What help is there available to make an informed choice of major?

The [Advising & Learning Assistance Center](#) (ALAC) has set up a one credit Freshman seminar to help students make a decision about a major. As part of this seminar interest tests are given and reviewed with each student individually. Faculty and students from all of the schools are available during the seminar to meet with students.

What major should I take?

There are many factors involved in deciding a major but the most important one is what interests you. The Advising & Learning Assistance Center can help with this process. Meeting with the advisors in the departments that interest you is a good step as well as taking introductory courses to familiarize yourself with the various fields of study within the schools.

What classes should I take?

First year classes are generally specified by the curriculum of the school you are enrolled in. For students enrolled in the School of Engineering this includes completing core courses as well as the required courses determined by the institute. Once you have declared a major your advisor will work with you on which courses to take. For those students who have not declared a major several departments offer one credit introductory courses that provide students with the basics of that particular field.

Can I substitute a different class for a required course?

Substitutions must be approved by the Degree Clearance Officer (DCO) within the department and written notification is sent to the Registrar's Office. You should meet with your advisor and/or the DCO to determine which substitutions are most commonly approved.

Can a program requirement be waived?

Waivers must be approved by the Degree Clearance Officer. Your advisor may recommend that a requirement be waived, but this may not be possible if accreditation issues are involved.

Can I repeat a course?

Yes, if you repeat the identical course as an undergraduate at Rensselaer, both grades will appear on your student record and transcript. However, keep in mind that:

- The grade received in the repeated course is always the one used in computing your GPA.
Note! If a student repeats a course that they previously passed, and fails the course, the failure takes precedence and the student has not completed the course requirements for graduation purposes.
- The course credit will count only once.
- Independent Study courses, courses taken on a P/NC basis, or courses taken at another institution cannot be used to replace the original course grade.
- Repeating a course for which a "WI" grade was originally received will not replace that grade in determining the GPA.

The recalculation of GPAs to account for repeated courses occurs at the end of the semester after all grades for all students have been processed.

Under Rensselaer's Repeated Courses Policy, courses taken at another college are not eligible to replace the Rensselaer grade in calculating the QPA.

How do undergraduates get involved in research? Can they? Do they all?

The best way to get involved in a research project is to approach instructors in classes you have or are taking. Visit their web sites and see what research they are working on to see if it interests you. Even if you cannot find a project that interests you in your major field, you will find that faculty in all the Institute's schools conduct research and may need undergraduate researchers to assist them.

How do I get an internship?

Internships and [Cooperative Education \(Co-Op\)](#) are both managed by the [Career Development Center](#). An important first step is to officially register in the co-op program. You will then have access to JobLink, the CDC's on-line recruiting system, where you can link to employers who are looking for co-op students, and read about those whose requirements you meet.

When should a co-op be taken?

Many courses in the some majors are offered only once a year and some courses have to be taken in sequence. Therefore, students going to Co-op require a careful planning. Probably the best time for students to go to Co-op would be the third year, either fall or spring.

Can freshmen have cars on-campus?

Parking is hard to find, and freshmen are not allowed to purchase Rensselaer parking passes. If you do choose to bring your car, you must park it on the street, which may be difficult. For more information, see <http://www.rpi.edu/dept/parking/>.

Will I have time for extracurricular activities?

Absolutely. Just do not overdo it by signing up for everything at once—academics come first. Extracurricular are a great place to meet people and relieve stress, so do not miss out.

Arch FAQs

When will I be expected to take The Arch?

Students in the Class of 2022 will be required to participate in the Arch program in summer 2020.

Does this mean it will take more than four years to graduate?

With the exception of students in the five-year bachelor of architecture program, matriculation to degree completion is not intended to take more than eight terms at Rensselaer. To accelerate your academic progress, and graduate in fewer than eight semesters, you may take classes elsewhere prior to enrollment at Rensselaer, obtain AP/IB credit from high school, take summer courses in subsequent summers, study abroad during the away semester, or some combination of these options.

Do I have to pay tuition during my "away" semester?

No. The semester away is an opportunity to pursue internships, co-ops, and collaborative research, as well as athletic, entrepreneurial, philanthropic, and community service activities.

What will I do on my semester "away" from Rensselaer?

You can take advantage of numerous co-curricular and experiential activities available off campus, including international travel, internships, co-ops, research opportunities, and engagement in community service projects.

Will I have help in finding a co-op or internship?

Students seeking a co-op or internship experience during their "away" semester will have the full resources of the Center for Career and Professional Development available to assist them in their search.

What if I want to study abroad?

Formal study abroad through our exchange programs would not be considered an away semester as students' pay Rensselaer tuition.

Students can, however, also pursue study abroad during their away semester through non-affiliated programs. In that case, students pay tuition to the host institution.
